01

Neuroplasticity

NEURO = NERVOUS SYSTEM

PLASTICITY = ΠΛΑΣΤΟΣ = MOLDABLE
Greek Root

Let's begin by breaking
down the term...

Neuroplasticity

02

Key Chapters

Key Chapters

– *Midnight Resurrections* (Stroke Recovery and Rehabilitation)

- **Concept of Neuroplastic Rehabilitation:** This chapter discusses how Dr. Edward Taub used **Constraint-Induced Movement Therapy (CIMT)** to help stroke patients regain use of paralyzed limbs.
- **Theory of Learned Non-use:** Taub discovered that when patients avoid using an affected limb, the brain “learns” not to use it, reinforcing the disability. His therapy challenges this by forcing patients to use the affected limb, stimulating new neural pathways.
- **Outcome:** This demonstrates that even severely damaged brains can reorganize and recover function with consistent, targeted practice.

Key Chapters

– *Brain Lock Unlocked* (Stop Worries, OPsessions, Compulsions, and Bad Habits)

- **OCD and Self-Directed Neuroplasticity:** Dr. Jeffrey Schwartz developed a **Four-Step Method** to help patients manage OCD by retraining their brains.
- **Self-Directed Neuroplasticity:** Patients can train their brains to rely less on obsessive thinking and to increase self-control.
- **Outcome:** This chapter shows how neuroplasticity can help people get rid of bad habits and negative thinking, illustrating the brain's potential to change its own behavioral patterns.

Key Chapters

– *Dark Side*

- **Case Study on OCD and Self-Directed Neuroplasticity:** Dr. Jeffrey Schwartz developed a **Four-Step Method** to help patients manage OCD by retraining their brains.
- **Self-Directed Neuroplasticity:** Patients learn to resist compulsions and reframe obsessive thoughts, creating new neural pathways over time. This technique empowers patients to exert conscious control over their brain's wiring.
- **Insight into Habit Formation:** Schwartz's work suggests that intentional behaviors can alter neural patterns, which has implications for how AI could reinforce or disrupt cognitive habits.

03

Critical View

for the book

Critical View of *The Brain That Changes Itself*

Strengths:

- Revolutionary insights into neuroplasticity
- Engaging and inspiring real-life case studies
- Challenges conventional medical limits

Limitations:

- Focuses heavily on positive outcomes
- Limited discussion on risks of neuroplasticity

03

Link with AI

Link with AI

Similar

Just as the brain changes neural networks through external stimuli, AI also relies on constantly adjusting algorithms and models to adapt to new data.

Difference

Although AI models can "learn" by constantly adjusting parameters, their learning mechanism is based on algorithms rather than physiological nervous systems. Therefore, AI's learning and adjustment do not truly reflect the complexity of neuroplasticity.

05

Critical View

for AI

Critical View for the AI

- The intention of the intervention: **treatment or manipulation?**
- Privacy and Data Security
- Over-reliance on “plasticity”

Conclusion

- Neuroplasticity shows the brain's adaptability and potential for recovery.
- Highlights possibilities for treating neurological challenges.
- Emphasizes risks of repeated negative experiences reshaping the brain.
- Raises ethical concerns on AI's influence on cognitive patterns.
- Encourages responsible design in technology to protect mental health.

Thanks!

Instructions for use

If you have a free account, in order to use this template, you must credit [Slidesgo](#) by keeping the [Thanks](#) slide. Please refer to the next slide to read the instructions for premium users.

As a Free user, you are allowed to:

- Modify this template.
- Use it for both personal and commercial projects.

You are not allowed to:

- Sublicense, sell or rent any of Slidesgo Content (or a modified version of Slidesgo Content).
- Distribute Slidesgo Content unless it has been expressly authorized by Slidesgo.
- Include Slidesgo Content in an online or offline database or file.
- Offer Slidesgo templates (or modified versions of Slidesgo templates) for download.
- Acquire the copyright of Slidesgo Content.

For more information about editing slides, please read our FAQs or visit our blog:

<https://slidesgo.com/faqs> and <https://slidesgo.com/slidesgo-school>

Instructions for use (premium users)

As a Premium user, you can use this template without attributing Slidesgo or keeping the "Thanks" slide.

You are allowed to:

- Modify this template.
- Use it for both personal and commercial purposes.
- Hide or delete the "Thanks" slide and the mention to Slidesgo in the credits.
- Share this template in an editable format with people who are not part of your team.

You are not allowed to:

- Sublicense, sell or rent this Slidesgo Template (or a modified version of this Slidesgo Template).
- Distribute this Slidesgo Template (or a modified version of this Slidesgo Template) or include it in a database or in any other product or service that offers downloadable images, icons or presentations that may be subject to distribution or resale.
- Use any of the elements that are part of this Slidesgo Template in an isolated and separated way from this Template.
- Register any of the elements that are part of this template as a trademark or logo, or register it as a work in an intellectual property registry or similar.

Use our editable graphic resources...

You can easily **resize** these resources without losing quality. To **change the color**, just ungroup the resource and click on the object you want to change. Then, click on the paint bucket and select the color you want. Group the resource again when you're done. You can also look for more **infographics** on [Slidesgo](#).

...and our sets of editable icons

You can **resize** these icons without losing quality.

You can **change the stroke and fill color**; just select the icon and click on the **paint bucket/pen**.

In Google Slides, you can also use **Flaticon's extension**, allowing you to customize and add even more icons.
